

1.1.1.QI. FOOD SAFETY POLICY REVISION 04

LMS NATURAL CASING S.L. It is a company in the food sector dedicated to the manufacture, marketing and distribution of natural casings, an activity that has been carried out since 2001 and that is characterized by supplying its customers with safe and high quality products.

LMS NATURAL CASING S.L. it is aware of the possible food safety risks that may be generated in its production processes, which is why it has a Food Safety Management System based on international standards according to FSSC 22000.

Due to the commitment of **LMS NATURAL CASING S.L.** with food safety, the quality and satisfaction of our customers and the authenticity of our products, from the Management of this company, and through this Food Safety Policy, we want to transmit both to all our staff, and to any person related to us or our products directly or indirectly, our principles of commitment to the development, implementation and continuous improvement of the Food Safety Management System.

The implementation of this system is intended to:

- To provide the necessary means to achieve complete customer satisfaction, the quality and authenticity of our products and the commitment to Food Safety.
- Satisfy at all times the applicable requirements, including compliance with legal and regulatory requirements, as well as the specifications of customers that ensure the safety, authenticity and quality of food.
- To create a culture of ethical and professional responsibility in each and every one of the workers of **LMS NATURAL CASING S.L.** in terms of achieving safe food and customer satisfaction.
- Establish actions and programmes aimed at the prevention and detection of possible food hazards, based on the HACCP system and take the necessary measures to alleviate the consequences of these and avoid their repetition.
- To raise awareness regarding the sustainability and environmental responsibility of **LMS NATURAL CASING S.L.** and its workers through the rational and sustainable use of resources and the manufacture and use of products based on renewable raw materials, minimizing the generation of waste, including food losses and waste

- Establish the necessary resources to prevent the pollution that derives from its activity while focusing its efforts on minimising the generation of waste in order to reduce the environmental impact as much as possible.
- Establish the necessary measures to eliminate, and when this is not possible, prevent occupational risks by implementing the corresponding improvement measures and taking into account all those aspects necessary to guarantee the safety and health of people at work
- To create awareness that, at all times, a process must be able to be reviewed step by step and thus evolve to achieve continuous improvement of the system.
- To establish communication channels, both internal and external, that allow responding to requests for information related to the Food Safety System.
- Ensure that all personnel involved in food safety have the necessary skills and training.

In order to comply with the Food Safety Policy, measurable objectives are defined and reviewed periodically, as well as the Policy, for their continuous adaptation to the requirements and quantification of their degree of effectiveness.

This policy is communicated to the entire company and is displayed in a visible place in the organization and available to interested parties who request it.
